

Austronet Ground Protection Cover Product Information

Our air permeable Austronet ground protection cover has proved a real hit with the event organisers as it offers a number of benefits over more traditional methods. One client used around 8000m² to protect the grass pitch at a football stadium where a sell out concert attracted over 26,000 fans. On the day after the event they found that the grass under the Austronet was still fresh and green, unlike an area they had covered with a solid pvc film which had turned yellow. In addition to the cost benefits they found the Austronet rolls easy to handle, that it allowed the rain to pass through rather than forming puddles and that the collection of all the rubbish and cigarette ends was a lot quicker as it was all lying on top of the net rather than embedded into the ground.

Sunbaba Environmental Statement

As a company, we are working closely with both our clients and suppliers to reduce environmental, economic and social impact of our products and have a number of recycling options available. Sunbaba is currently in the process of working towards BS9801 compliance.

Austronet Ground Protection Cover

Key Points

- Air and water permeable
- Allows grass to breathe
- Rolls are easy to handle
- Flame retardant
- Makes rubbish collection easier
- It can be reused for a number of events

Tech Spec

- Weight - 140gm/m²
- Air permeability @ 30%
- Colours
- Black, bright blue, dark green, grey, red and white.
- Roll widths 4 x 50m, 5 x 50m
- FR Certification - Flame retardant - DIN 4102 B1

Developed from our well proven 203FR range, our air permeable Austronet ground protection cover is knitted from an eco-friendly, high density polyethylene which is water, tear and mould resistant, is easy to clean and can be reused a number of times. It is available in a range of colours including black, dark blue, bright blue, grey, red and white and has the Din 4102 B1 rating for flame retardant fabrics. When using our Austronet ground protection cover we recommend a minimum overlap of 25 to 30cm and that all the edges are secured with our special plastic earth pegs every 50cm. If you would like further information, sample swatches or prices just give us a call.
