We have seen a dramatic growth in the demand for our fabric graphics over the past two years and it is a trend we expect to continue. Therefore, as part of product development programme Sunbaba have introduced a range of Fabric Edge Frames to assist our clients in displaying their branding to best effect. Edge Frames are part of the next generation of display solutions, that allows the simple fitting and removal of fabric graphics. They are modular in design and are available in a range of standard sizes or can be supplied bespoke to meet a clients specific requirements. The lightweight, aluminium frames are simple to assemble using a single tool and can be supplied in a number of formats e.g. freestanding, wall mounted, ceiling hung and even curved.

Sunbaba Environmental Statement

As a company, we are working closely with both our clients and suppliers to reduce environmental, economic and social impact of our products and have a number of recycling options available. Sunbaba is currently in the process of working towards BS9801 compliance.

Our modular, aluminium frames are extremely versatile and can be used either free standing for conferences, exhibitions, events or roadshows, wall mounted in showrooms, reception areas and museums or ceiling hung. The fabric graphics are finished with a special silicone keder which simple slots into a profile on the frame, so the graphics are easy to fit and and can be removed in seconds. As you fit the graphic it becomes tensioned removing creases from the fabric. The frames also have an integral system channel around the outer edge which allows the easy attachment of accessories e.g. literature racks and display tables. If you would like any further information, fabric samples or prices please give us a call.
