Event Signage
Product Information

Sunbaba, one of the UK's leading event branding specialists have over a decade of experience in providing cost effective, imaginative signage for exhibitions, festivals and sporting events. We offer a full range of print media including PVC, UltraMesh, our popular air permeable Austronet and a full range of rigid materials including foamex, correx, dibond and even digital printed plywood. Sunbaba can produce signs of virtually any shape or size and finished to meet your specific requirements, all to the highest specification. We also offer a range of accessories including cable ties, ball and hook bungees and bungee cord to help you ensure you display your event signage to best effect. If you would like further information, print samples or prices just give us a call.

Sunbaba Environmental Statement

As a company, we are working closely with both our clients and suppliers to reduce environmental, economic and social impact of our products and have a number of recycling options available. Sunbaba is currently in the process of working towards BS9801 compliance.

Every year we produce large volumes of event safety and information signs for our clients, in most cases they are customised for a particular event and often cannot be reused e.g. the arrows pointing the wrong way for the exit. As a result we have introduced a range of modular safety and information signs offering our clients a more versatile and sustainable solution. These modular signs can be easily reconfigured to suit each event. At Sunbaba we don't just sell branding; we offer a service that includes advice and support right from the start through to completion. As a result we have developed strong relationships with all our clients large or small, so if you would like further information, print samples or a quote just give us a call.

All general health and safety signs should include a pictorial symbol categorised by shape, colour and graphic image. For further information please refer to The Health and Safety (Safety Signs & Signals) Regulations 1996. The normally accepted colour for general information is blue although corporate colours can be used.
