

**DyeMat** - an ideal solution to help you maximise your visual marketing opportunities. Sunbaba's new dye-sub printed carpet tiles provides an innovative way of building and reinforcing your own or your clients brand with photographic floor images or corporate branding.

DyeMat tiles are printed in full colour using the latest dye-sublimation print technology on 3mm polyester carpet tiles. The tiles are an ideal promotional tool and dovetail perfectly in with your other branding activities for conferences, exhibitions, corporate events or retail promotions. So you can bring you event to life with full colour photographic floor images or even promote your stand at an exhibition in the registration area or in the aisles. They can also be used to provide a warm, tactile, luxurious wall hanging as well.

DyeMat display flooring is available in tiles of 150cm<sup>2</sup> or 75cm<sup>2</sup> and are quick and easy to lay, the tiles should be stored flat for reuse. The tiles are designed primarily for internal low traffic applications and should be fixed securely to avoid the possibility of being a trip hazard.

**Environmental Responsibility**

Sunbaba as a major supplier of large format graphic displays are acutely aware of our environmental responsibilities and are committed to finding ways of reducing the environmental, social and economic impact of our products. Sunbaba are moving over from solvent based inks to UV cured and water based inks and using materials, which can be either recycled or biodegrade with minimal environmental impact in line with principles of BS8901 and ISO14001.

Our DyeMat display flooring is printed with water based, dye-sublimation inks.
