

Austronet 204UV

High-Quality Branded Windbreaks

Austronet 204 is a highly durable, weather-proof material that offers courts long-term protection from cross-winds and a professional, smart appearance. Favoured by the LTA and a very popular choice for sports clubs, schools and construction sites.

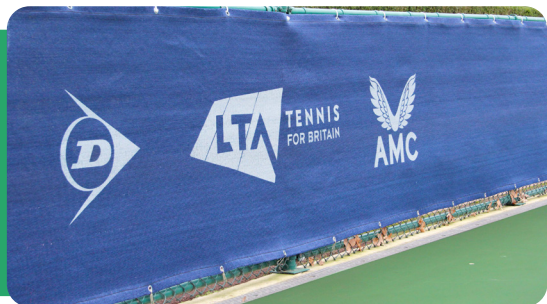

Technical Specifications

Austronet 204 allows an air-transfer of 22% with a slightly tighter knit weave. This should be a consideration when branding less exposed areas of the site, or when additional privacy is preferred.

Shading Value: 65% - 95%
Weight: 200g/m²

- ✔ Highly Durable
- ✔ Weatherproof
- ✔ Screen-printed
- ✔ UV or FR treated

Austronet 203UV

High-Quality Branded Windbreaks

Austronet 203 is a highly durable, weather-proof material that offers courts long-term protection from cross-winds and a professional, smart appearance. Favoured by the LTA and a very popular choice for sports clubs, schools and construction sites.

Technical Specifications

Austronet 203 boasts air-transfer of 60% without compromising on screen-print quality. This should be a consideration when branding more exposed areas of the site.
