

This template represents 10% of the actual print size.

Where possible, we advise the use of vector graphics, particularly for logos, text, and sharp-edge designs. Please ensure all fonts are converted to outlines or curves.

When raster images are needed, please embed high-resolution images (1000 dpi @ 10% scale) to avoid blurring upon magnification.

Before submitting, please review your artwork at full-size scale (10x the template) to ensure clarity and quality and ensure that the colour mode is set to CMYK for print readiness.

Thank you.
